

Q2 unit, wherein said signal is generated based on at least a portion of the display unit information;

wherein information is bi-directionally communicated with the video source and the display unit.

IN THE ABSTRACT OF THE DISCLOSURE:

Please delete the abstract and insert the following abstract therefor:

--ABSTRACT OF THE DISCLOSURE

Q3 A display unit and method having a communication controller which is capable of bi-directionally communication with a video source. Video signals for video display are received from the video source and a memory stores at least display unit information, wherein the display unit information includes identifying information of the display unit. The communication controller communicates the display unit information to the video source and the display unit receives a signal from the video source that is generated based on at least a portion of the display unit information.--

REMARKS

The indication that claims 24-29 are allowed and that claim 32 is objected and would be allowable if rewritten in independent form, is acknowledged. By the present amendment, claim 32 has been written in independent form incorporating the features of parent claim 30 therein, such that applicants
